DETAILED ACTION

Response to Arguments

Applicant's arguments, see "AMENDMENT IN RESPONSE TO NON-FINAL OFFICE ACTION", filed 10/31/2005, with respect to Claims 1 - 16 have been fully considered and are persuasive. The rejections of 103 (a) has been withdrawn.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Prior art failed to disclose or imply:

"An electroconductive rubber roller having an outermost rubber layer made of a rubber composition containing an ionic-conductive rubber as a main component thereof, wherein the surface of said outermost rubber layer comprises an oxide film formed by oxidation of the outermost rubber layer by irradiating with ultraviolet rays and/or ozone; and said rubber composition contains a dielectric loss tangent-adjusting filler to set a dielectric loss tangent of said electroconductive rubber roller to 0.1 to 1.5."

Art Unit: 3725

The closest piece of art (Hashimoto, US 6,648,807 B2) discloses some claimed subject matters except for an electroconductive rubber roller having an outermost rubber layer surface which constitutes an oxide film and its dielectric loss tangent limitations.

However, prior art of record fails to disclose the claimed subject matter as set forth above.

Therefore, the electroconductive rubber roller per claims 1 – 17 herein are being allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
